RE: FODS Trackout Control System DEP PA Approval

To Whom It May Concern:

Please accept the below letter excerpt as indication from the DEP PA that FODS Trackout Control System may be used as an alternative to a traditional stabilized construction entrance.

At this time it was decided after review of the Rumble pad description on page 17 of the E&S manual that your FODS trackout system would fall under preconstructed rumble pads and may be used on construction sites without further review/demonstration if you conform to the 50' length to provide 4 tire revolutions while on the pad.

Thanks,

William D. Himes, P.E. | Senior Civil Engineer, General
Department of Environmental Protection | Bureau of Clean Water
3001 Fairway Drive | Altoona, PA 16602-4493
www.dep.pa.gov

Please feel free to contact me directly with any additional questions regarding FODS and it's use in the State of Pennsylvania.
